## Arrival and Departure of Mails

Following is the new mail schedule at Logan, Utah, postoffice on account of the new time card of the Oregon Short Line, effective Sunday, May 17, 1914.

### CLOSING OF MAILS

East, West, North and South.....7:50 a. m. 5:20 p. m.  
Preston Branch, North.....10:40 a. m. 7:15 p. m.  
Branch Loop South, Hyrum, Wellsville, etc.....5:20 p. m.  
Providence and Millville, via R. F. D.....9:30 a. m.  
Benson and King, (except Sunday).....1:30 p. m.  
R. F. D. 1, College Ward, (except Sunday).....9:30 a. m.  
R. F. D. 2, North Logan (except Sunday).....9:30 a. m.

### ARRIVAL OF MAILS

East, West, North and South...8:30 a. m. 11:30 a. m. 8:00 p. m.  
Preston Branch.....8:40 a. m. 6:10 p. m.  
Branch Loop, Wellsville, Hyrum etc.....11:30 a. m.  
Providence and Millville.....4:30 p. m.  
Benson and King (except Sunday).....12 noon  
R. F. D. 1, College Ward.....4:30 p. m.  
R. F. D. 2, Greenville, North Logan.....1:00 p. m.

All windows at the post office are closed on Sundays the entire day. General delivery stamp and carrier windows are open on holidays from 9 to 10 o'clock a. m. Only two dispatches are made on Sundays: Main line, all points, 7:50 a. m.; Preston Branch, North, 7:15 p. m.

Very respectfully,  
JOSEPH ODELL, Postmaster.

### MRS. GRENELL ON

#### COLORADO STRIKE

President of Law and Order League  
Tells President Wilson an Exaggerated Account Has  
Been Given

Washington, May 25.—Mrs. Helen Grenfell of Denver, vice president of the Law and Order League of Colorado, presented to President Wilson today a detailed statement of the coal strike situation, contending that exaggerated accounts of the trouble had been given publicity.

Mrs. Grenfell and the organization she represents insists that Colorado should handle her internal affairs. She did not, however, favor a proposal to withdraw federal troops immediately. She favors arbitration under certain government direction.

President Wilson listened for half an hour to Mrs. Grenfell's petition and showed much interest.

Senator Kenyon in a conference today with President Wilson urged that immediate steps be taken to end the Colorado coal strike by forcing a settlement of the disputed questions. The senator also brought forward the name of George E. Roberts to the federal reserve board. Mr. Roberts was one of those originally under consideration.

## Hatchtown Dam Swept by Water

Salt Lake, May 26.—The biggest dam break by far in the history of Utah occurred at 3 o'clock yesterday afternoon, when the great Hatchtown dam in Garfield county, went out. The break occurred on the north side of the dam and is understood to have been caused by a landslide, although definite information had not been received at a late hour last night.

The breaking of the dam let loose a small ocean, as the reservoir, which was protected by the dam, contained approximately 14,000 acre feet of water. In area the reservoir which is situated on the Sevier river in Sevier canyon, is one and one half miles in length. The water at some places reaches a depth of forty to fifty feet. The reservoir was fed from Mammoth and Asay creeks, tributaries to the Sevier river.

At a late hour last night the water was running thirty feet deep between the reservoir and Panguitch, eighteen miles distant. It was reported at midnight that the water had reached the vicinity of Panguitch, but as the town is forty feet higher than the crest of the flood, no damage is expected in that city.

#### Damage Will be Heavy

Owing to the fact that the break was quickly discovered and that the dam went out gradually no lives are believed to have been lost, but the property damage will be heavy. As soon as the break was discovered couriers were sent out and telephones brought into requisition, with the result that all persons in the pathway of the flood were notified in time to make their escape to high ground and save their lives, although it is believed that many will be homeless as a result of the break.

As soon as the dam went out and the great flood of imprisoned water was set free the Sevier overflowed its banks and for a considerable distance on each side the water averaged a depth of thirty feet.

Between Panguitch and the dam, there are between fifteen and twenty homes, which are presumed to have been washed away. The total of the inhabitants is estimated at between seventy-five and one hundred.

It is also understood that the damage will be heavy from Panguitch down to the Plute reservoir, but it was said last night that the danger would doubtless cease when the Plute reservoir is reached, as that reservoir can take care of a large amount of the water.

#### Telephone Line Is Down

The poles of the United States Telephone & Telegraph Company were washed out by early evening, but messages were gotten through from Panguitch by private wires.

The opinion was expressed last night that the breaking of the dam will result in damages that will mount into the hundreds of thousands of dollars, as, in addition to the loss of homes and other buildings, big areas of farm lands will be flooded to such an extent that it will be impossible to raise crops upon them this year.

The Hatchtown project is a state institution and work upon the system was begun early in 1907. The work on the system, which includes the big dam which went out yesterday, the diversion dam, two miles south of Panguitch and the canal constructed by the state, cost approximately \$175,000. The system was practically finished about a year ago, although it is understood that some work was still to be done.

The water stored in the reservoir which was projected until yesterday by the big dam, was sufficient for the irrigation of 7000 acres of land about 5000 of which has been contracted for.

#### Dam Was Built in 1908

The dam that went out yesterday is approximately sixty to sixty-five feet high and three hundred feet long and is of earth work with a riprap face. It was estimated last night

that the water in the reservoir would cover about seventy-five city blocks of Salt Lake to a depth of twenty to twenty-five feet.

The dam was completed in 1908 by D. B. Brinton, of Holliday who had the contract for the work. Mr. Brinton said last night that the contract called for \$65,000, but that the work cost about \$100,000 before it was finally accepted by Caleb Tanner, who was the state engineer at that time. Mr. Brinton added that the dam was constructed under the general supervision of David Jensen, who formerly lived in Logan, but who is now supposed to be living in Springville.

The break in the dam, coming at this season of the year, will probably do an irreparable damage, so far as the crops of this year are concerned. It was estimated last night that the break in the dam is such that it would be practically impossible to repair it this year in time to furnish water for the farms.

The Agricultural College has an experiment station, or farm, comprising sixteen acres of land three miles from Panguitch and across the Sevier river, but persons acquainted with the location of the station said last night that they did not believe it would be affected by the flood.

### STORY OF KIDNAPING

TOLD TO GRAND JURY BY

REV. L. R. PATMONT

Police Are Trying to Locate Automobile in Which He Was Transported

Danville, Ill., May 25.—Arrest of the men said to be concerned in the alleged kidnaping of the local option leader Rev. Louis R. Patmont who disappeared March 31 from Westville and was found last Saturday bound and gagged in an abandoned farmhouse near Columbia, Mo., is expected as a result of the testimony given by the minister before the grand jury today.

States Attorney J. H. Lewman refused to make public the evidence which the kidnaped prohibitionist laid before the grand jury. Mr. Patmont will resume his testimony tomorrow.

The police are trying to locate the automobile in which Mr. Patmont says he was kidnaped. The minister said today he would be unable to identify the machine in which he was conveyed to the house in which he declares he was held prisoner for nearly two months, and in which he was later driven to the farmhouse near Columbia where he was discovered.

The minister asserted the four men who kidnaped him in Westville were strangers. He believes he could identify two of them.

### GOOD ANIMALS

Professor Surface of Pennsylvania comes to the defense of the snake as a farmer's friend. His children all are very friendly with the snakes about the place. All Pennsylvania snakes should be protected except the poisonous ones; and of these we think there are only two in Pennsylvania, the rattlesnake and the copperhead. Snakes eat bugs, locusts, worms, and other insect pests; so do toads. Toads are of probably more value than snakes, and when a snake eats a toad he is doing more harm than if he swallowed himself. But it seems better to have two useful animals like toads and snakes struggling for survival than to carry on the war against insects in a snakeless and toadless world.

Barbed wire cuts, ragged wounds, collar and harness galls heal up quickly when BALLARD'S SNOW LINIMENT is applied. It is both healing and antiseptic. Price 25c, 50c and \$1.00 per bottle. Sold by Riter Bros Drug Co.—Advertisement.

### SUPREME COURT

#### ANNULS ORDER

Washington, May 25.—The supreme court today annulled the interstate commerce commission's order in the Tap line cases.

The court upheld the commerce court, which annulled the commission's order on the ground it acted arbitrarily in holding that allowances could not be granted on freight of interests owning both the lumber and the tap lines, but could be granted on freight of other interests shipping over the tap line.

Justice Day, in announcing the court's decision, said the decision did not, however, prevent the commission from striking down divisions of thru rates, if such divisions were used to grant actual rebates. The court held in effect that the mere division was not to be regarded in and of itself as a rebate.

The decision was unanimous. Trunk lines in the yellow pine districts of Missouri, Arkansas, Texas and Louisiana had cancelled joint through rates on lumber shipped over the tap lines and the trunk lines. The commission held that the tap lines were not entitled to have the joint rates restored and that any allowances or divisions from the trunk lines to 92 of the tap lines were unlawful. The commission held further that where the tap lines were owned by a lumber company such an allowance was in effect a rebate.

The best known employee of a Cincinnati firm of tailors is the colored porter, Jerry. In order to conserve all of the good will and bad book accounts the firm has incorporated under a name that covers several panes of glass, and following this abridged city directory is the abbreviation "Inc." A customer, while being measured remarked to Jerry: You seem to be the only man in the shop whose name does not appear on the window. What's the trouble? Oh, I see, boss, all right, replied Jerry. I see de ink.

### HUERTA DENIES ENVOYS

HAVE AUTHORITY TO ELIMINATE

Mexico City, May 20.—Provisional President Huerta, in an interview today said:

"The Mexican peace delegates have no instructions to offer my resignation at the conferences at Niagara Falls.

The president spoke with energy, and emphasized his words with a characteristic gesture of the right hand.

Prior to this, the acting minister of foreign affairs, Esteva Ruiz, had declared that the Mexican representatives had been given ample powers by the government to deal with every thing that may be discussed at the peace conference, with the object of solving the international difficulty.

The keenest interest is manifested by all classes in the peace conference. The department of foreign affairs is in close touch with the delegates and the Brazilian minister is receiving dispatches from the Brazilian ambassador relative to the conference. Americans here are being kept informed of events by the minister.

The management of the National railways announced today that trains for the north would be operated only to San Felipe on the line between San Luis Potosi and Mexico City, until further notice. Telegraphic and railway communication has been interrupted about eight miles south of San Luis Potosi.

A train loaded with American refugees will leave for Puerto Mexico tonight, the government giving guarantees of safety.

### NOTICE

Users of water from city water mains are hereby notified that all residing west of Main street should sprinkle their lawns in the forenoon and those residing east of Main street in the afternoon. This regulation must be complied with, or prosecution will follow.
